

Risques informatique : « Jusqu'à, on nous prenait pour des paranos »

	Risques informatique : « Jusqu'à, on nous prenait pour des paranos »
---	---

1. **Introduction**
The purpose of this document is to provide a comprehensive overview of the project's goals, objectives, and scope. It serves as a reference point for all stakeholders involved in the project.

2. **Project Goals and Objectives**
The primary goal of this project is to develop a robust and scalable software solution that meets the needs of our users. Key objectives include:

- Develop a user-friendly interface that enhances the user experience.
- Implement a secure and reliable backend system.
- Ensure the system is scalable and can handle future growth.
- Conduct thorough testing to ensure the quality of the final product.

3. **Scope of the Project**
The project scope is defined by the following components:

- Functional Requirements:** The system will include features such as user authentication, data management, and reporting tools.
- Technical Requirements:** The system will be built using modern technologies, including a microservices architecture and a cloud-based infrastructure.
- Timeline:** The project is scheduled to be completed within a 12-month period.
- Budget:** The project budget is estimated at \$500,000, covering all development, testing, and deployment costs.

4. **Stakeholders and Roles**
The project involves several key stakeholders, each with specific roles and responsibilities:

- Project Manager:** Oversees the overall project and ensures it stays on schedule.
- Development Team:** Responsible for the design, development, and testing of the software.
- QA Team:** Conducts quality assurance to ensure the system meets the required standards.
- Users:** The end-users who will interact with the system.

5. **Risk Management**
Identifying and managing risks is a critical part of the project. Key risks include:

- Scope Creep:** Changes in requirements that could lead to project delays or cost overruns.
- Resource Availability:** Ensuring that the project has enough resources to complete on time.
- Technical Debt:** Managing the accumulation of code that is difficult to maintain or modify.

6. **Conclusion**
This document provides a clear and concise overview of the project's goals, objectives, and scope. It is intended to serve as a guide for all project participants and to ensure that everyone is aligned with the project's vision and mission.
