TOP SECRET//COMINT//20291123 **DNI 101** How Do I Begin Analyzing a Target's Email Address? Target's Email address Consider (e.g., jihadi@mail.com) USSID 18/ Host Country restrictions Query Raw Traffic/Targeting Verify using NKB/Foxtrail Metadata Content FOREMAN Is Target Tasked? TAO for IPs Research Collection using using for Classified Open Source Databases Marina Pinwale Retro Xkeyscore Near-real-MecWeb/Mainwa Active Passive FAA (>1 Year) Dishfire using using time TrafficThief Collection Collection tipping Lionheart Fusion Maui/Anchory/M3 WWW (<1Year) Intelink Google/Yahoo Homebase Online D-bases Pinwale Dissem Proton, Pinwale, NSA Library (standing query) using Publications etc. using using using using using in search of TrafficThief via UTT Cadence UTT Foreman UIS Pinwale Data TUNINGFORK Names, numbers (CT) Manager Addresses, orgs, titles, URLs, Marina alternate email add's, phone #s countries, nationalities, etc. Then you view results using IMPORTANT: Understand the different between RESEARCH and TARGETING So you did all that and now DNI Presenter UIS/Pinwale you are finding results? Content POC: Querying in raw-traffic databases is TARGETING!! Booz|Allen|Hamilton (Raw Traffic DBs: Pinwale, Xkeyscore, Marina, Dishfire, TrafficThief) Great! =Tool/Database Now What? Do RESEARCH before TARGETING (Research tools: WWW, Speedbump, =SIGINT value Foxtrail, NSlookup, Domain Lookup, Anchory)
